JOB MARKET PAPER

Title: "Who Did the ACA Medicaid Expansion Impact? Using Linear Discriminant Analysis to Estimate the Probability of Being a Complier" (Revise & Resubmit: Health Economics)

Abstract: Who were the compliers in the ACA Medicaid expansion? Using linear discriminant analysis (LDA), I estimate how characteristics relating to socioeconomic status and race/ethnicity affect the likelihood that an individual will be a complier, defined as those induced by the expansion to obtain Medicaid coverage. Across multiple specifications, part-time and full-time workers are more likely than non-workers to be compliers. Not only is this result more prominent for Black individuals, but they are also more likely to be compliers compared to other racial/ethnic groups. This paper not only serves to identify the types of individuals who were directly impacted by the expansion, but it also introduces a new approach that combines complier analysis with techniques from machine learning.

PROFESSIONAL EXPERIENCE

University of Hawai'i at Mānoa, Center on Aging Graduate Research Assistant

Honolulu, HI 2019 - Present

- Performed data collection, data cleaning, data visualization, data analysis, and data quality assessment of administrative health insurance claims data using R and Python.
- Assisted in the preparation and crafting of evaluation reports for the Hawai'i Opioid Initiative.
- Collaborated with research analysts, data scientists, and junior faculty in the design, creation, and release of the Hawai'i Behavioral Dashboard.
- Mentored and supervised fellow colleagues in performing rapid lit reviews; preparing and rendering reports in LaTeX; and learning techniques in data collection, data cleaning, data visualization, and data inference in R and Stata.

University of Hawai'i at Mānoa, Department of Economics Lecturer

Honolulu, HI 2019 - Present

- Taught undergraduate courses in the subjects related to microeconomic theory, macroeconomic theory, and data analysis and visualization.
- Designed and constructed a learning curriculum that is easily accessible for students both in classrooms and online environments.
- Created and implemented a six-week intensive summer data analysis and visualization course for students pursuing quantitative economics.

University of Hawai'i at Mānoa, Center on Disability Studies Educational Coach

Honolulu, HI Aug 2019- Dec 2019

- Assisted students with special health care needs on improving their academic and self-management skills such as time management, organization, and study habits.
- Helped students identify and build strengths to transfer abilities across domains, develop individual plans for academic support, and foster growth of affective skills.
